

CRYSTAL SANDS™ INSTALLATION INSTRUCTIONS

- Place the selector handle in the backwash position.
- **Remove the screws from the filter top. Remove the filter lid and screw the screws, by hand, back into the filter top to prevent sand/glass from entering the threaded holes.**
- **Place a plastic bag securely over the top (centre) drain to avoid sand/glass from falling into it.**
- The sand must be removed from the filter tank by hand taking care not to damage the bottom drain assembly and or fingers.
- Once all the sand has been removed fill the tank half way with tap water.
- Slowly pour the new **Crystal Sands** into the filter tank leveling the glass by hand for every bag. Rinse the filter lid, tank top and plastic bag with a hose to remove excess glass.
- Remove the plastic bag from the top drain and remove the screws from the tank top, replace and line up the filter lid and replace the screws diagonally in a clockwise direction by hand.
- Once the screws are hand tight, switch the pump on and tighten the screws until no water leaks from the lid.
- Backwash until the sight glass is clear then rinse in the same manner.
