FILTRATION:

Glass WhizDom® “Crystal Sand®” is lighter, more durable, has a higher surface area and higher purity than silica sand, ideal for pool, municipal water and a myriad of industrial filtration applications. Crystal Sand® is manufactured from pure, unused window glass, free of bacterial residues found in container (bottle) glass

ABRASIVES:

Glass WhizDom® glass grit is produced from selected window glass scrap. Cleaned raw material is crushed in equipment designed to produce sharp cubic shaped particles, ideal for abrasive blasting. **SA3 (ISO 8501-1) Surface Finish on steel** using Glass WhizDom® grit leaves a pure “white metal” finish.

Ideal for stainless steel and non ferrous metal blasting, substituting glass beads, garnet and aluminium oxide

Glass WhizDom glass grit is inert, contains no free silica and is completely non-hazardous.

Packaging Options:

Glass WhizDom packed in 20/25 kg bags in bulk bags or 1 ton bulk bags (SG = >2.5, Bulk Density 1.2 – 1.6)

Standard Size Specification - Custom sizing available
